

Connectivity and security that works in demanding environments — federal facilities & waterfronts, healthcare & professional build-outs, and complex commercial sites.

CURRENT PERFORMANCE **U.S. Navy Enterprise Network Modernization**

As a subcontractor supporting U.S. Navy enterprise network modernization, Mercury Communications delivers 24/7 network operations center (NOC) monitoring, network integration, and field support across Navy installations in CONUS and OCONUS locations. Mercury's scope includes maritime and waterfront network connectivity monitoring, centralized next-generation firewall management (Palo Alto Networks), and a proprietary network-monitoring and telemetry platform that gives operators real-time visibility across distributed sites.

NOC Operations (Tier 1-3)

Network Integration & Field Support

Firewall / Edge Security Management

Real-Time Monitoring & Telemetry

CONUS/OCONUS Deployment

COMPANY PROFILE

Mercury Communications, LLC is a Service-Disabled Veteran-Owned Small Business (SDVOSB) and ISO 9001:2015-certified communications and low-voltage integrator. Built on an RF and satellite-communications engineering foundation, we design, install, and manage structured cabling, wireless and RF networks, electronic security, and managed network services — delivered under single-vendor accountability and documented ISO 9001:2015 quality processes. We are a licensed and bonded VA Class A contractor serving federal, commercial, and institutional clients across the mid-Atlantic.

CORE COMPETENCIES

- ◆ **RF & Wireless Networks** — PtP/PtMP, Wi-Fi, 5G/LTE/CBRS design and deployment
- ◆ **Structured Cabling** — Cat6/Cat6A and fiber; commercial and shipboard systems
- ◆ **Electronic Security** — IP video surveillance, access control, alarm & detection (DCJS-licensed)
- ◆ **Cellular Enhancement / DAS** — in-building and on-ship cellular amplification
- ◆ **Network Infrastructure** — firewall, switching, VLAN segmentation, ISP integration
- ◆ **Managed Network Services** — proactive monitoring, helpdesk, and managed security
- ◆ **Starlink / SATCOM** — fixed and mobile satellite connectivity and interconnect

DIFFERENTIATORS

- ◆ **SDVOSB + ISO 9001:2015** — quality-managed delivery with documented procedures, not guesswork
- ◆ **Single-vendor accountability** — cabling, network, security, and managed services from one licensed contractor; one point of contact after cutover
- ◆ **Licensed & bonded** — VA Class A Contractor and DCJS Electronic Security licensed; WV reciprocal
- ◆ **RF/SATCOM engineering depth** — heritage in satellite uplink, microwave, and shipboard comms

PAST PERFORMANCE

FEDERAL

- **U.S. Navy** — Shipboard 4G/5G/LTE cellular system integration
- **U.S. Navy** — On-ship high-speed broadband Wi-Fi integration
- **U.S. Navy** — Network management services
- **USSOCOM** — Cellular 4G/5G/LTE DAS integration
- **USDA** — RF microwave network integration
- **DHS** — 4G/5G/LTE cellular DAS integration
- **USGS** — 4G/5G/LTE cellular DAS integration

COMMERCIAL

- **Healthcare** — New-facility build-out for a regional women's health practice (Martinsburg, WV): structured cabling, UniFi network core, IP video, access control, and managed network services
